BHARATH N S

AI/ML Engineering Student | Aspiring AI/ML Intern
8310204058 | bharathnsnirvani@gmail.com | Cambridge Institute of Technology North Campus

Career Objective

First-year B.E. student specializing in Artificial Intelligence & Machine Learning with a strong academic record (9.565 CGPA) and hands-on experience developing ML and AI-based projects. Seeking an AI/ML internship to apply programming and machine learning skills to real-world problems, gain industry experience, and continue developing practical AI solutions.

Education

B.E. – Artificial Intelligence & Machine Learning	Expected 2029
Cambridge Institute of Technology North Campus	1st Year CGPA: 9.565/10
1st Sem: 9.4 SGPA | 2nd Sem: 9.7 SGPA	
PUC / 12th – Science (PCMB)	93%
SSLC / 10th	92%

Projects

AI-Based Landslide Risk Prediction – NER Region

- Developed a software-based ML prototype for landslide risk prediction and early-warning support in the North Eastern Region of India.
- Applied Random Forest machine learning techniques to historical/environmental data for risk prediction.
- Worked on data preparation, model development, application interface, testing, and presentation.
- Developed the prototype with the support of AI-assisted development tools.

MediKiosk – AI-Based Patient Intake & Care System

- Developed an AI-based patient intake solution designed to streamline OPD history-taking and preliminary patient information collection.
- Integrated AI-assisted interaction and voice-based/multilingual features to improve accessibility.
- Worked on application development, UI, AI features, testing, and presentation using AI-assisted development tools.

Smart Helmet for Rider Safety

- Designed and developed an individual prototype for rider safety through helmet detection and alcohol detection.
- Used an IR sensor to detect helmet usage and prevent vehicle starting when the helmet is not worn.
- Used an MQ-2 sensor for alcohol-related detection with warning output through display/buzzer.
- Integrated Arduino Uno, RF transmitter/receiver, relay, LED, buzzer, starter mechanism, and DC motor.

Hackathons & Leadership

- Smart India Hackathon (SIH) — Participated with the AI-Based Landslide Risk Prediction project for NER region.
- HackVerse Hackathon — Participated with the Smart Helmet for Rider Safety project; received a participation certificate.
- Leadership: Hackathon Team Leader

Achievements

- 9.565 CGPA in 1st year of Engineering.
- Achieved highest SGPA in 1st year.
- Received academic performance awards in SSLC and PUC.

Technical Skills

Programming: C, Python, Java
DSA: Data Structures and Algorithms
AI/ML: Machine Learning, NLP, Generative AI
Libraries/Frameworks: NumPy, Pandas, Scikit-learn, YOLO
Tools & Platforms: Google AI Studio, Gemini, VS Code, Git/GitHub, Jupyter Notebook, Arduino IDE, Canva

Certifications / Courses

IBM Generative AI Course — In Progress

Soft Skills

Problem Solving • Leadership • Teamwork • Adaptability • Creativity • Presentation • Continuous Learning
